BBC-2

7.0 Sport of the Day

A recording of part of one of the day's leading sporting events

7.50 Cinema 625

'The Goddess' is a film from India

Saturday

DR. WHO and the Chase

The space and time travellers in a new adventure starting today once more meet

THE DALEKS

1 It is never advisable to say too much about what is liable to happen in a *Dr. Who* story, but two important facts about 'The Chase,' the new adventure which begins today, can be revealed. First, the Tardis will be losing two of its passengers; Ian and Barbara, the Earth-dwelling school teachers who came aboard by chance right at the beginning of the series, are due soon to depart from the scene. And, secondly, the travellers will be coming up once more against their most sinister adversaries—the ruthless Daleks.

The story is by **Terry Nation**, and it starts with the materialisation of the Tardis on a most uninviting planet. It is a place of barren desolation scorched by the rays of two fierce suns, and while Ian and Vicki set off to explore, Barbara and the Doctor settle down to experiment with the 'Visualiser' taken from the Space Museum. Before long a familiar image is looming up on their screen—that of the Daleks.

In spite of their fierce nature (or perhaps because of it), the flat-voiced, sensor-studded Daleks have captured the young imagination in Britain more completely than any other science-fiction creation for years, and they are popping up in the shops in every conceivable form. The *Dr. Who* enthusiast can celebrate his favourite programme by wearing Dalek slippers and washing with Dalek soap. He can play various Dalek games, the sort that are played on a board, as well as a new type of bagatelle. If he feels creative he can write his own scripts with Dalek pencils and ball-point pens; if not, he can read about the creatures in newly published books and follow their doings in a picture-strip in a popular children's comic. In fact, two *Dr. Who* strips are running at the moment; the other is concerned with *Dr. Who's* adventures generally.

As for model Daleks, they come in all sizes. There are big Daleks you can get inside, little ones driven by batteries, remote-control ones, ones that work by friction drive, and some that enjoy what is known as 'tricky action'—when they hit an obstacle they trundle off in another direction. So, all in all, it seems that the Doctor and his companions have every right to be worried—the Daleks are quite definitely taking over. **MICHAEL WILLIAMS**
